PROFESSIONAL SUMMARY

Bachelor of Science in Information Technology graduate (Cum Laude, August 2026) with hands-on experience in SQL, database design, and dashboard reporting across two independent analytics projects and an IT internship. Detail-oriented and analytical, with a track record of turning raw data into clear, decision-ready insights.

SKILLS

Programming Languages: Python, JavaScript, HTML/CSS, PHP

Data Analysis & BI: Power BI, DAX, Power Query, Excel (PivotTables, PivotCharts), dashboard design

Data Management: SQL (PostgreSQL, MySQL, SQLite, SQL Server), JOINS, window functions, Pandas, relational data modeling

Tools: VS Code, AWS (RDS, S3), Microsoft Office, Google Workspace, AI-assisted research & analysis (Claude, ChatGPT)

Languages: Filipino, English

EDUCATION

Bachelor of Science in Information Technology

August 2026

Cavite State University — Trece Martires City Campus

Relevant Coursework: Database Systems, Web Development, Computer Networks

Award: Cum Laude, August 2026

EXPERIENCE

IT Intern

Feb 2026 – Jun 2026 (5 months)

Office of the Provincial Engineer — Trece Martires City, Cavite

- Performed data encoding, document digitization, and electronic records management, ensuring accuracy and completeness of administrative data.
- Prepared reports and maintained project-related records, working independently with minimal supervision.
- Provided technical support by troubleshooting hardware, software, and office application issues to maintain daily operations.

PROJECTS

BrightMart Retail — Sales Dashboard (Personal Project) | Power BI, DAX, Power Query

Aug 2026

- Built an end-to-end sales analytics dashboard from a 10,700-row raw dataset, cleaning and validating data in Power Query.
- Developed 12+ DAX measures including time intelligence functions; identified and corrected a data-calculation error through careful review.
- Discovered the top-performing region's Electronics sales share (65%) significantly exceeded the company-wide average, directly informing a targeted discount-policy recommendation.

Meridian Health Group — Employee Analytics Database (Personal Project) | SQL Server, Excel, Power Query

Aug 2026

- Designed a normalized SQL Server database (6 tables, foreign keys, self-referencing manager hierarchy) consolidating 1,200 employee records across salary, performance, and exit data.
- Wrote analytical SQL queries using JOINS, CASE WHEN, and window functions (ROW_NUMBER, RANK with PARTITION BY) to calculate attrition and pay equity by department.
- Found one department's attrition rate (21.8%) was nearly double the best-performing department's (13.5%), directing retention efforts toward targeted investigation over a blanket policy.

Facial Recognition Attendance System — Capstone | Python, FastAPI, PostgreSQL, OpenCV, AWS

Aug 2025 – Jun 2026

Cavite State University — Trece Martires City Campus

- Automated real-time attendance tracking across multiple laboratory rooms via facial recognition, eliminating manual sign-ins and syncing data between a desktop app and a cloud-based web portal.
- Achieved 1–3 second recognition speed with all system modules passing testing; rated 4.90/5 for functional completeness by respondent evaluation, the highest-scoring category.
